

Usage Instructions

The program can be accessed via the URL: <https://cs467-inkclusive.herokuapp.com/>
When users first encounter the website, they will be met with a simple layout with a blank textbox awaiting input along with directions instructing them to either type, paste, or upload text that they would like to have scanned. After the user inputs the document that they would like to examine, they would simply hit the Scan button and have the results appear on the output textbox, with the profanities in their text highlighted for them. The user can go on to click each individual highlighted word in order to read a description for it. For the purposes of this app, there is a default description set for the majority of profanities, with more in-depth descriptions for those pertaining to racism.

1. Sample Scan

This word doesn't have a description associated with it please contact site administrator

Back

2. User selects 'Damn' (standard profanity)

CALL A SPADE A SPADE

Racist phrase that means to "explicitly call something by its rightful name", but has racist undertones for African Americans

Back

3. User selects 'call a spade a spade' (custom profanity)
